ABSTRACT

Transcriptions of recorded conversations of nine-year-old French children are analyzed and presented in this comparative word count. The actual count of the 55,588 word corpus is arranged alphabetically and contrasted with selected, identical words found in the Francais Fondamental word list. Proper nouns are listed separately at the end of the regular count, and grammatical functions of items are mentioned when a word appears. The count lists word frequency, word totals, and the Francais Fondamental word count. Discussion of classification, column labels, and notes on child language are included. For the companion document from which this word frequency count is derived see FL 001 897. (RL)

INTRODUCTION

In November 1963, a joint conference in Paris of the Nuffield Foreign Languages Teaching Materials Project and the Centre de Recherches et d'Etudes pour la Diffusion du Français agreed that each organisation should undertake a pilot survey of the spoken and written language of children aged 8 - 13, and that all information resulting from the transcription and analysis of the data should be made freely available in both countries:

The collection of such a corpus in both countries is now completed. The transcriptions of British children's language is almost completed, while C.R.E.D.I.F. have published transcripts of the speech of 9 and 10 year old children. They have kindly allowed these French transcripts to be published in Britain by N.F.L.T.M.P. so that they may be more widely available here.

Both organisations have initiated analysis of their data, and this volume consists of a word count carried out on the French 9-year old transcripts. This is supplementary work and in no way overlaps with work being done at C.R.E.D.I.F. It was carried out on an experimental part-time basis by a group of Leeds postgraduates under the direction of R. J. Handscombe. On Mr. Handscombe's departure to the University of Ontario the final stages of the work were supervised by R. W. Rutherford. Miss Margaret Wears completed the analysis, and prepared the final version for publication.

EXPLANATORY NOTES

The items in this list have been arranged alphabetically and Proper Nouns are listed separately at the end. The grammatical function of an item is mentioned only when it occurs with more than one function in the transcripts.

e.g.

	WF	Totals
bonbon (noun)	2	
bonbons (noun)	6	
bonbon (adj)	1	9

A. Classification

Verbs are classified under the infinitive regardless of whether the infinitive occurs in the transcripts or not. Individual parts of the verb are inset under this heading.

e.g.

	WF	Totals
accompagner		
infin	1	
perf. 3rd sing.	3	4
accuser		
imp. 3rd sing.	1	1

Tenses of verbs are abbreviated as follows:

infin	=	infinitive
pres	=	present
fut	=	future
imm fut	=	immediate future
imper	=	imperative
imp	=	imperfect
perf	=	perfect
plup	=	pluperfect
cond	=	conditional

Frequencies for the verb 'aller' include the use of this verb as an auxiliary in the immediate future tense.

Nouns are classified under the singular form, if it occurs in the transcripts, and the plural form is inset.

e.g.

	WF	Totals
abeille	4	
abeilles	4	8

Phrases are classified under the noun head.

e.g.

	WF	Totals
heure	32	
heures	47	
tout à l'heure	10	
à tout à l'heure	1	
de bonne heure	1	91

Phrases which do not contain a noun are classified under the verb head (e.g. 'avoir beau' under 'avoir').

The only exception is a clause where the preposition is a prefix, in which case the phrase is classified according to the initial letter of the clause (e.g. 'au-dessus de' under 'à' but 'au bout de' under the noun head 'bout'.)

Adjectives are classified in the following order: masc. sing., masc. plur., fem. sing., fem. plur.

e.g.

	WF	Totals
beau	20	
beaux	2	
belle	11	
belles	6	39

B. Column Labels

'Word Frequency' column shows the frequency for each individual item.

e.g.

	WF
accrocher	
pres. 3rd pl.	2
imp. 3rd sing.	2
perf. 3rd sing.	2
plup. 3rd sing.	1

'Totals' column contains figures which refer to the total frequency for all forms of the item which occur in the sample, and are the sum of the figures in the Word Frequency column for this item.

e.g.

	WF	Totals
allumer		
infin.	1	
pres. 3rd sing.	1	
imper. 2nd sing.	1	3

One total frequency figure is given for all tenses of verbs, singular and plural forms of nouns, and masculine, feminine and plural forms of adjectives. When only one form of the item occurs in the sample, the figure in the 'totals' column is identical to that in the 'Word Frequency' column (e.g. accordéon - WF. 3, Totals 3.)

'F.F.' column refers to the frequency recorded in the Français Fondamental word count.

e.g. accident - WF. 5; Totals. 5; FF. 43.

The total number of words counted in Français Fondamental is 312,000, and the total number of words in this count is 55,588 words.

The F.F. references are recorded differently from this count (e.g. they do not break down into sing. and pl.) The F.F. reference is therefore given alongside our first reference (example 1) and the different ways in which it is used are listed below where this information is given in F.F. (example 2).

example 1.

	WF	Totals	FF
affaire	2		65
affaires	9	11	

example 2.

	WF	Totals	FF
air	12	12	atmosphere 54
			avoir l'air 45

Some phrases are classified differently by Nuffield and Français Fondamental (e.g. 'avoir l'air' under (avoir' in Nuffield and under 'air' in Français Fondamental).

C. Notes

(a) Children's mispronunciation

Deviations from normal spelling of words in this list are due to children's mispronunciation:

antimaximatose, bouchier, ectrocuter, éventaltil, garde à bout, gobule, lours, maximatose, picadéor, secoupe, sisson, sourciliaires.

(b) Use of Slang

Words occur in this list which are found to be classified under the following headings in the Robert dictionary:-

(1) Popular

barbant, calé, chiqué, enquiquiner, flingue, grouiller, maboule, marrant, moche, planquer.

(2) Familiar

barbant, bouquin, copain, copine, fichu, flemmard, gars, machin, piger.

(3) Argot

enquiquiner, mec, planquer.

(4) 'Langage enfautin'

dodo

Certain words used by children in the sample do not occur in the Robert dictionary. It is suggested that they might fall under the following headings:-

Argot

bidule, chouchouter, dingue, fastoche.

Children's abbreviation

prem	=	première
deuz	=	deuzième
troize	=	troizième

Children's own inventions

pourquoi que quoi que quoi
se rendezvouzer
bridger

When one child uses the verb "se rendezvouzer" he is immediately ridiculed by his friends. Children in the sample frequently use the wrong gender as in "pardessus la marché".

We wish to thank Miss Shelagh Spencer for her patience in typing a difficult manuscript.

Finally, we thank the Leeds postgraduates who did the initial spade-work: L. Phillips, M. Edmondson, G. Armitage, M. Simpton, D. Grass, J. Pirie and J. Reilly.

R. W. Rutherford
M. Wears

September, 1968.
